Seeking a position as a junior web developer. Recently completed the full stack web development program at UCR extension. Have a BA in business economics and strive to find creative solutions to ensure client satisfaction. Worked as a teacher for the last eight years and have taught science and history at the secondary level. Looking to channel my creativity and problem solving through web development. Team oriented and self motivated with experience working with teams for front-end and back-end applications.Take an analytical approach to problem solving and would like to apply my newly acquired technical skills.

Whether playing a team sport, coaching a team sport, or working as a teacher; collaboration, communication, organization, and time management have contributed to my success and to the success of those around me. I hope to be an asset for your organization.

TECHNICAL SKILLS

Frontend: HTML, CSS, React, JQuery, Javascript, Bootstrap, AJAX, Handlebars
Backend: Nodejs,Mysql, Node Express, MongoDB, Passport.

PROJECTS

SuggestSoCal app | https://github.com/mitch-t/SuggestSoCalapp.git
|https://mitch-t.github.io/SuggestSoCalapp/

Collaborator

- This app uses api data to assist users in choosing activities in Southern California.
- This project demonstrates the AJAX method and Javascript functions to retrieve data. The app has a clean lay-out and responsive design. I was responsible for the Javascript and AJAX functions for the dining suggestion.
- **Tools/Languages:** HTML, CSS, JavaScript, JQuery, AJAX, Materialize CSS.

ManyGigs | https://manygigs.herokuapp.com/
 | https://github.com/mitch-t/ManyGigs

Collaborator

- This is a CLI app that uses Node.js inquirer to create a team profile based on user input. This app is tested with jest.
- I was a collaborator on this project. Created the home page for users to login. Also, created the dropdown menus to collect and store user data. Still working and updating this application.
- **Tools/Languages:** HTML, CSS, JavaScript, Nodejs, React, Axios, Multer, Mongoose.

Budget Tracker | https://github.com/mitch-t/travelBudget |
| https://obscure-sea-28002.herokuapp.com/

Creator

- This app allows a user to track their expenses on or offline.
- This app utilizes a service worker JavaScript file to cache user data. Also, displays data in charts using a js library
- **Tools/Languages:** HTML, CSS, JavaScript, MongoDB, Node Express, Morgan.
